abbasi-1277872a0

TECHNICAL SKILLS

- HTML / CSS / JavaScript
- React.js & Vite
- Java & Java Swing
- PHP & MySQL
- C++ Programming
- Git & GitHub
- UML / System Design
- Arduino / IoT

SOFT SKILLS

- Project Management
- Team Collaboration
- Leadership
- Critical Thinking
- Effective Communication
- Time Management

DESIGN SKILLS

- Graphic Designing
- Logo Making
- Social Media Post Design
- Web Design (UI/UX)

TOOLS & SOFTWARE

- Adobe Photoshop
- Adobe CorelDraw
- Canva
- MS Office 365 Advance
- Eclipse IDE · XAMPP

LANGUAGES

- English (Fluent)
- Urdu (Fluent)

PROFILE

BS Software Engineering student at IIUI with hands-on experience in full-stack web development, desktop application development, and HCI/UX design. Passionate about building intuitive, data-driven interfaces and applying software engineering best practices. Actively seeking opportunities to contribute to a dynamic team while growing as a software engineer.

EDUCATION

- BS Software Engineering — IIUI** 2023 – 2027
 - International Islamic University Islamabad | Current CGPA: 2.79 / 4.0
- Intermediate (ISC) — F.G Degree College For Women, Rawalpindi** 2020 – 2022
 - 791 / 1100 71%
- Matriculation — Glorious English School, Rawalpindi** 2019 – 2020
 - 960 / 1100 85%

INTERNSHIPS

- Graphic Designer Intern - SyncroBytes (Remote) 5-week** July 2025-Aug 2025
- Graphic Designer Intern - Hostel Valley (Remote), 4-week** June 2025-Aug 2025

CERTIFICATION

- Certificate in Computer Application** June 2023-Aug 2023
 - Technical Education & Vocational Training Authority
- Certificate in IT ADVANCE** Sep 2022-Feb 2023
 - AGT Institute of Technical & Professional Education
 - Typing, FCC, MS Windows, MS Office, DBMS, IN PAGE, Hardware /Software Installation, Networking
- Certificate of IoT Bytes**
 - International Islamic University Islamabad.

PROJECTS

- SkillBlaze E-Learning Platform (HCI Project)** React.js · Vite · localStorage
 - Built a fully dynamic e-learning platform with course enrollment, embedded video lectures, lecture-completion tracking, and a quiz-gated certificate system — all powered by a centralised localStorage data layer handling auth, progress, and user profiles.
 - Applied all 10 Nielsen Usability Heuristics and HCI laws (Hick's, Fitts's, Miller's, Gestalt, Jakob's) across every page, with real-time dashboards, search & filter, responsive layout, and conditional certificate unlocking based on live quiz data.
- GlamFusion Full-Stack Desktop Simulation App** Java · Swing · PHP · MySQL · XAMPP
 - Developed a full-stack desktop fashion simulation game where users apply makeup, hairstyles, and outfits on a base model built with Java Swing featuring a multi-layer PNG rendering engine overlaying assets across a close-up Makeup Page and full-body Style Studio viewport.
 - Engineered a Java HTTP client-server bridge transmitting session data to a PHP/MySQL backend for profile persistence, with modular layouts (GridBagLayout, BorderLayout, JScrollPane) managing UI consistency throughout.
- CoLabX Hub Collaboration Platform (SCD Project)** React.js · GitHub REST API · Git
 - Built a role-based platform (Admin / Mentor / Learner) with dynamic room management (Public, Private, Restricted), threaded discussions, and a project sharing system with upvoting, contributor tracking, and comment threads.
 - Integrated GitHub REST API for live repository analytics on dashboards, full CRUD via localStorage for rooms, projects, tasks and messages, and managed the dev lifecycle using Git branching, conflict resolution, and secure token handling.
- Radar System for Object Detection and Visualization** Arduino · Processing IDE
 - Built a functional radar using Arduino Uno, an ultrasonic sensor, and a servo motor, with real-time object detection visualised dynamically in Processing IDE.
- Contact Book System** C++
 - Developed a contact management system in C++ using a Binary Search Tree (BST) with full CRUD operations and DFS/BFS traversal for efficient contact lookup.
- VR Headset & Glasses — SRS Document** UML · System Design
 - Authored a comprehensive Software Requirements Specification including use cases, workflows, and functional/non-functional requirements with innovative safety response features
- Cyber Security Magazine** MS Word · Photoshop · Canva
 - Created a multi-page cybersecurity magazine covering threats, network security, and compliance showcasing graphic design and team collaboration skills.
